PROFESSIONAL SUMMARY

Software Engineer with a strong foundation in computer science, data structures, algorithms, and object-oriented programming. Experienced in C#, Java, Python, JavaScript, and SQL, with practical expertise in React.js, .NET MVC, Node.js, Express, MySQL, and REST APIs. Proven success designing full-stack applications, including hackathon-winning builds. Skilled at bridging technical and business needs, with a record of automating workflows, improving process efficiency, and achieving 99%+ accuracy in high-volume loan analysis. Seeking software engineering or technology analyst roles applying problem-solving, algorithmic thinking, and cross-functional collaboration.

CORE TECHNICAL SKILLS

Languages: C#, Java, Python, JavaScript (ES6+), SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, .NET / .NET MVC, Bootstrap, SASS

Databases: SQL Server, SSIS, MySQL, Supabase, Query Optimization

Software Engineering: OOP, Data Structures & Algorithms, Design Patterns, REST APIs, Debugging

Testing & QA: Jest, React Testing Library, Unit & Integration Testing

Tools & Platforms: Git/GitHub, Visual Studio 2022, Jira, Agile/Scrum, Salesforce, Excel, Tableau, SharePoint

Cloud: AWS (Cloud Fundamentals, IT Certificate)

PROFESSIONAL EXPERIENCE

Associate DevOps Engineer — AAA Auto Club Enterprises (Contract)

Oct 2025 - Present

- Build and debug full-stack features and internal tooling in C#/.NET and JavaScript/React, integrating REST APIs with SQL Server back ends.
- Pull and reconcile Sabre booking (PNR) data across multiple agency point-of-sale systems, populating shared tracking sheets the team uses to surface missing invoices.
- Automate the daily data pull with a Python script using delta logic — processing only new records and appending to history without overwriting prior data.
- Co-develop an SSIS package to load booking data into a SQL Server reporting table, reducing manual Excel handoffs (in progress).
- Maintain data integrity and accuracy across source systems and support reporting handoffs (SharePoint) that feed Tableau dashboards.

Junior Software Developer — Workforce Opportunity Services (Full-time)

Jun 2025 - Present

Client: AAA Auto Club Enterprises · Dallas-Fort Worth Metroplex

- Completed an immersive 3-month software development training, then placed on a client engineering team.
- Build full-stack features and REST APIs using C#/.NET and modern JavaScript/React; debug and code-review across the front and back end.
- Work in Agile/Scrum sprints — story estimation, daily stand-ups, and iterative delivery.

Quality Analyst — Visio Lending (Remote)

Feb 2022 - Jun 2025

- Performed quality assurance within the loan-origination system (LOS) for the nation's largest independent DSCR (rental-investment) lender, reviewing 5,200+ loan files annually at 99.8% accuracy.
- Reviewed DSCR ratio calculations, rental-income and appraisal data, and property eligibility on investor loan files to uphold underwriting and investor guidelines.
- Automated loan-workflow and data-entry tasks across Salesforce (macros, validation logic) and Excel, accelerating file processing by 35%.
- Served as cross-functional liaison across compliance, legal, and development teams to resolve loan-file discrepancies and reduce downstream rework.

Mortgage Underwriter / Analyst — United Wholesale Mortgage (Remote)

Jan 2021 - Feb 2022

- Underwrote and analyzed residential mortgage loan files at the nation's #1 wholesale lender, assessing borrower risk and ensuring compliance with investor and program guidelines on conventional, government, and jumbo loans.
- Worked in UWM's proprietary loan-origination system (EASE), running automated underwriting through Desktop Underwriter (DU) and Loan Product Advisor (LP) and clearing loan conditions.
- Analyzed income, asset, and credit documentation in Excel and managed loan/borrower data in Salesforce, improving tracking accuracy and turn times across the broker channel.

Technical Analyst — Verizon (Hybrid)

Feb 2019 - Dec 2020

- Delivered technical product training and onboarding to 50+ business clients, improving product adoption and reducing support escalations.
- Partnered with sales and development teams to translate customer requirements into technical solutions, exceeding performance targets by 120%.
- Diagnosed and resolved product and connectivity issues using CRM and ticketing/ITSM systems (Salesforce, ServiceNow), acting as the bridge between customers and engineering teams.

Technical Analyst — Amazon (Rochester, MI)

Oct 2015 - Feb 2019

- Provided technical and customer support for 1,000+ clients with a 98% issue-resolution rate.
- Drove process improvements in inventory management and product demonstrations, increasing operational efficiency.
- Documented recurring issues and resolutions to build reusable knowledge-base resources, improving team response times.

HIGHLIGHTED PROJECTS

Full portfolio and live demos: portfolio-v1-blond-rho.vercel.app

Sonic Wave Audio Player — Hackathon Winner ([Live Demo](#) | [Code](#))

- React, React Router, iTunes Search API, SCSS, axios — built in 48 hours; fetches tracks via the iTunes Search API and challenges players to identify the song and artist from a short audio clip before the reveal.

BirdWatch Pro ([Live Demo](#))

- React, JavaScript, Bootstrap — interactive app using filtering, conditional rendering, and lifting state up; demonstrates scalable React patterns.

Band-Site ([Live Demo](#) | [Code](#))

- HTML5, SCSS, Bootstrap, JavaScript — multi-page band website built from a Figma comp, including a generated shows listing and a client-side interactive comment section.

EDUCATION & CERTIFICATIONS

- B.S. Information Technology — Northeastern University (2022–2024), GPA 3.7
- Software Engineering Bootcamp (Immersive Certificate) — BrainStation (2023), GPA 4.0; Chase Scholarship (Top 25%); built full-stack React/Node.js and React Native projects across 15+ Agile user stories.
- AWS IT Certificate (Cloud Fundamentals, IT Infrastructure)
- Google UX/UI Design Certificate

LEADERSHIP & RECOGNITION

- Speaker & Panelist: React Miami, eMerge Americas, Women's History Month.
- Community: AmeriCorps Service Member, Habitat for Humanity Volunteer.
- Awards: Chase Scholarship (2023), Global Recreational Ambassador (Northeastern).
